Graph: A line graph showing a signal trace over time.

Bottom Buttons: TARGET (57.00), ACTUAL (55.85), CAGE (55.95), PARAM, BACK

FIGURE 49

CAGE CONTROL MONITOR

Pressure: 10.00
 Temp: 10.00
 Discharge: 1.00
 Self: 1.00
 Prime: 1.00
 Alarm: 1.00
 ZeroSol: 1.00
 OutPut: 1.00
 FullSol: 1.00
 Mode: AUTO
 Update: 50

The central display shows a waveform graph with a grid. The waveform is a complex, multi-peaked signal. The x-axis is labeled 'TIME' and the y-axis is labeled 'VOLTAGE'.

At the bottom, there are five buttons: **ENTER**, **ACTUAL**, **CAGE**, **PARAM**, and **BACK**. The **ACTUAL** button displays the value 75.00, and the **CAGE** button displays the value 64.89.

FIGURE 50

The screenshot displays the 'CAGE CONTROL MONITOR' program interface. On the left, a list of parameters is shown with their current values:

- Pressure: 55.23
- Dr: 2.7
- DeadBand: 1.5
- SetPt: 50.00
- Error: 2.7
- Drain: 0.35
- ZeroSol: -2
- Output: 3
- FullSol: 0
- Mode: AUTO
- Update: 1.00

 To the right of the parameters is a large graph area labeled 'ECHO' and 'Control'. The graph shows a waveform with several peaks and troughs, representing the control signal over time. Below the graph, there are four buttons: 'RESET', 'ACTUAL', 'CAGE', and 'PARAM'. The 'RESET' button shows the value '80.00', 'ACTUAL' shows '53.23', 'CAGE' shows '59.23', and 'PARAM' shows '5.00'. A 'BACK' button is also visible in the bottom right corner.

FIGURE 51

The image shows a control panel for a 'CAGE CONTROL SYSTEM'. The panel has a digital display showing the value '50.32'. Above the display is a graph with a fluctuating line. Below the display are five buttons labeled 'TARGET', 'ACTUAL', 'CAGE', 'PARAM', and 'S.D.C.'. The panel is mounted on a wall.
